Re: Land Rover Freelander Turbo Diesel

Dear Microlon Europe,

2 months ago I installed Microlon to my engine, transmission and to both differentials; there was an immediate marked increase in power!!!

I have seen improvements in fuel economy as promised, these have been between 4 ½ and 5 miles to the gallon.

The engine not only feels much smoother but is noticeably quieter as well.

I have to say that overall I am very impressed and pleased with your product.

Yours sincerely

F. Bale

North Devon.
